

REVIEW

of the teaching and methodological kit for the course "Geography of Kyrgyzstan" for full-time students majoring in General Medicine.

The curriculum for the course "Geography of Kyrgyzstan" was developed in accordance with the requirements of the State Educational Standard of Higher Professional Education of the Kyrgyz Republic, based on the core curriculum for the General Medicine major.

The educational and methodological package contains: course objectives, learning outcomes (competencies) developed during the course, the course's place in the structure of the core educational program, a course competency map broken down by topic, a course process map, a course point accumulation map, a thematic plan for distributing hours across classes, the course syllabus, learning objectives and outcomes by course topic, a calendar-thematic plan by class type indicating the competencies developed, hours, points, methods, assessment tools, literature, educational technologies, and the course's grading policy.

Based on the above, I believe the program under review fully meets the established requirements and can be recommended for students majoring in General Medicine.
