Must/Elective:	
Credit/Hours:	1

1. Baizakov. K+996707-33-30-37

2. Description of discipline:

The educational and methodological complex (EMC) for the academic discipline "Geography of Kyrgyzstan" has been compiled in accordance with the requirements of the Regulation on the educational and methodological complex at the level of higher education and is intended for students in the following specialties: General Medicine (for foreign citizens); in the cycle "General Mathematical and Natural Science Disciplines" in the state educational standards approved by the Ministry of Education and Science of the Kyrgyz Republic.

Course Objectives and Tasks – The course objectives and tasks are consistent with the general goals of the General Medicine major (for foreign citizens).

The course "Geography of Kyrgyzstan" occupies an important place among the natural sciences. This course offers significant opportunities for in-depth study of economics and addresses many important and interesting issues in economic and social geography and a number of related sciences.

- The main subject is the study of the territorial spatial organization of society.
- To develop a geographic worldview and a system of knowledge about economics and rational environmental management in economics students, both globally and in Kyrgyzstan.

The course objectives include teaching bachelor's students:

- To provide a comprehensive understanding of the patterns of distribution of natural conditions and production resources, population distribution, migration, the current state of the country's economy, its relationship with geographical factors (topography, natural resources, climate, etc.), as well as the prospects for economic development in the 21st century and other processes.
- To introduce the theoretical principles of geography to understand the social and economic situation in the country;
- To develop skills in studying scientific literature and official statistical reviews;

To master this course, the bachelor's student must be familiar with the following basic disciplines: ecology, geoecology, history of the Red Army, etc.

- The general course is designed for 18 classroom hours.
- The "Geography of Kyrgyzstan" course is designed for 10 semesters. Students' knowledge is determined by the module-rating system.

The place of discipline in the structure of the OOP (prerequisites, postrequisites) –
