Must/Elective:	
Credit/Hours:	2

Bishkek 2020

1. Kambarova N, +996709239350 / e-mail: nkambarova07@gmail.com

2. Description of discipline:

Studying the discipline "English Language" will help foreign students master a foreign language at a level that allows them to satisfy their basic communicative needs in everyday and professional spheres of communication, as well as in the formation of professional abilities and personal qualities of future doctors. A foreign language is necessary for doctors of all categories, first of all, for professional communication, i.e. for reading specialized literature.

The purpose and objectives of the discipline

The purpose of studying the discipline "English Language" is professionally-oriented training of future doctors, the formation of the basics of foreign language competence necessary for professional intercultural communication, mastering, first of all, written forms of communication in a foreign language as a means of information activity and further self-education. This goal is complex, including, in addition to practical (communicative), educational and upbringing goals. In this case, communicative competence is understood as the ability to correlate linguistic means with specific areas, situations, conditions and tasks of communication. Language material is considered as a means of implementing verbal communication, and a functional-communicative approach is used in its selection. Achieving educational goals is carried out in the aspect of humanization and humanitarization of education and means expanding the horizons of students, raising the level of their general culture and education, as well as the culture of thinking, communication and speech. The implementation of the educational potential of a foreign language is manifested in the readiness of specialists to promote the establishment of intercultural and scientific ties, to respect the spiritual values of other countries and peoples.

Main goals: at the end of this course, students should have knowledge of the following.

After mastering the discipline "English Language" the student:

- will know the phonetic structure of a foreign language, the main grammatical constructions and models of modern English and the conditions of their use;
- will be able to initiate a dialogue in typical communication situations (gratitude, request, apology, etc.);
- will understand and use in his scientific work original scientific literature on the specialty, relying on the studied language material, background regional and professional knowledge and skills of linguistic and contextual guesswork; construct his own statement based on the text read;
- will understand the basic information presented in individual dialogues and monologues of a social, every day and socio-cultural nature, as well as perceive authentic speech at a natural pace for native speakers, regardless of the features of pronunciation and the channel of speech;
- will use the acquired knowledge in written communication (letters, notes)

The place of discipline in the structure of the BEP (prerequisites, postrequisites) –

The discipline "English Language" is studied by students majoring in "General Medicine" and is included in the optional part of the humanitarian cycle of the studied disciplines of the State Educational Standard of Higher Professional Education.

The content of the discipline «English Language» is based on the content of such preceding disciplines as:

- in the cycle of humanitarian and general educational disciplines, including: philosophy.

- in the cycle of disciplines offered by the university: foreign language in the future, the knowledge obtained in the course of studying the discipline " English Language" can serve as a basis for mastering a more advanced level of a foreign language for special purposes (FLSP) in classes on fundamental and clinical disciplines. in graduate and doctoral studies, as well as for further foreign language self-education.

Competencies of students, formed as a result of mastering the discipline, planned results of mastering the academic discipline.

IC-3 - capable and ready for written and oral communication in the state language and official languages, capable of speaking one of the foreign languages for solving professional problems.
